

AUR20716 Certificate II in Automotive Vocational Preparation

Course Description

This course provides students with knowledge, skills and competency to increase their employment prospects and future training pathways in the automotive industry. It also provides students with the trade like skills and knowledge required of workers employed in a range of different automotive related fields.

The course is very hands on but there is some theory and written work for the knowledge component of the qualification. How to complete various types of workplace documentation and how to apply safe work practices are covered.

Potential Career Pathways

Whilst the WA College of Agriculture Morawa offers these courses in the context of skills needed in the Agricultural field, there are a number of potential career pathways available through this course.

The automotive industry is a fast-paced and exciting career choice. The industry employs over 300,000 people across Australia. Advances in technology have led to a growing number of career opportunities, and high vehicle sales have increased the number of vehicles requiring maintenance and repair. In turn, we are seeing a growing need for skilled tradespeople.

This course provides direct pathways into apprenticeships or traineeships within the automotive industry as a mechanic specialising in light and heavy vehicles, marine mechanic, small engines or outdoor power equipment. It is also a useful pathway to employment into the service and repair sectors.

Credit transfers may be possible into Certificate III Courses.

Costs

Costs are outlined further on the Information Tab.

Skills/Units

Upon completion of this course, you will have completed the following 12 units of competency:

| | |
|-----------|--|
| AURAEA002 | Follow environmental and sustainability best practice in an automotive workplace |
